I, respectfully, urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. XM Satellite Radio not only provides variety and quality, but it also allows me to listen to a radio signal in rural Texas, where there are dead areas. Since I travel alot on business I enjoy the local traffic and weather reports in cities where I don't know the radio dial numbers to get the information. This issue is about competition and improving services. The NAB needs to improve their products and services to combat competition instead of trying to limit competition via Congress and the FCC.
